Zoe Gershuny
OSU CS 406: Projects
Final Project Report
August 14th, 2020

Final Project Demonstration

You may download the files to your computer. The webpages are static so they are not navigable. You are able to open it in a text editor or an IDE of your choice or in the browser. Only the links at the bottom navigation bar in the home and main pages are active that will take to the project's GitHub page and my LinkedIn page.

You also may import the DDL file to a database of your choice. I can only confirm that it works on PhpMyAdmin. The SQL Queries should work if implemented in the database, like PhpMyAdmin.
